LALA

THE MILKVERSE

WEBSITE VISUAL ASSET & ART DIRECTION GUIDE

A cinematic, premium visual system for La La Paal Nilayam — combining Indian dessert culture, rich food photography and immersive WebGL storytelling.

01. Creative direction

Creative idea: LALA — The Milkverse. The website should feel like entering a luxurious, playful world built around milk, sweets and indulgence. The visual identity should be rich and unmistakably Indian without looking traditional or dated.

Palette

Colour	Hex	Use
Deep Burgundy	#4A0D17	Primary backgrounds
Maroon	#861E2C	Section transitions / accents
Saffron Gold	#D4AF37	Highlights / borders / particles
Cream	#F8E6D1	Text / light surfaces
Milk Brown	#A77A4E	Secondary warm neutral
Pistachio	#3F5C29	Small accent / ingredient details

Typography direction: high-contrast editorial serif for hero headlines; clean geometric sans-serif for navigation, menu descriptions and buttons. Suggested pairings: Playfair Display + Inter, or Cormorant Garamond + Manrope.

02. Master visual moodboard

Use this as the art-direction reference for the whole site. It is a concept board, not a source of verified shop branding or actual product photography. Replace logo and storefront depictions with owner-approved assets.

03. Image asset inventory

Build a consistent asset library. Prefer real photographs of the shop and actual menu items wherever possible; use generated imagery only for conceptual scenes or where genuine product photography is unavailable.

Asset group	Images / models to prepare	Recommended use
Brand identity	Logo light/dark, wordmark, favicon, packaging, signboard	Header, loading screen, footer, social links
Hero product	Masala paal glass, milk splash, saffron, almonds, pistachios, droplets	3D hero and scroll entrance
Hot beverages	Masala paal, badam milk, kova paal, special masala paal	Beverage menu cards
Cold beverages	Rose milk, falooda, fruit falooda, milkshakes, badam milk	Dessert section and menu
Traditional sweets	Beetroot halwa, carrot halwa, Mysore Pak, badusha, kalakand, laddu, Basundi, gulab jamun	Sweet universe and product grid
Buns & snacks	Kova bun, muska bun, carrot bun, beetroot bun, samosa, pani puri, dahi puri, bhel	Food section
Cafe food	Pav bhaji, burgers, fries, Maggi, chicken wings, cheese balls	Quick-bites section
Store photography	Exterior daytime, exterior night, signboard, counter, interior, staff at work (with permission)	Visit section and about-building
Local atmosphere	Triplicane street details, Chennai evening ambience, heritage textures	Background transitions; avoid implying false location imagery
UI assets	Category icons, ingredient cutouts, badges, map/phone/WhatsApp/Swiggy/Zomato icons	Navigation and menu
Texture library	Burgundy fabric, creamy liquid, gold grain, glass refraction, subtle paper	Backgrounds and shader materials

04. Recommended website image sequence

01 — Hero / The First Sip

One hero image or 3D render: a tall transparent glass of saffron-almond masala milk, creamy milk ribbon, suspended nuts and saffron, deep burgundy studio background. Leave negative space on the left for headline typography.

02 — Milk explosion

Wide cinematic liquid splash, creamy ivory milk arcs and suspended droplets, dramatic warm rim lighting. This can be a 3D scene or layered transparent elements.

03 — Sweet universe

Separate cutouts or studio images for beetroot halwa, carrot halwa, Mysore Pak, badusha, kalakand, laddu, rasmalai and gulab jamun. Shoot each product separately for flexible animation.

04 — Dessert universe

Tall glasses of rose milk, badam milk, mini falooda, royal falooda and fruit falooda. Use condensation, visible layers and premium glassware.

05 — Food experience

Overhead and three-quarter product photography for pav bhaji, pani puri, dahi puri, buns, fries, burgers, Maggi and snacks.

06 — Menu

Consistent product thumbnails on a neutral warm background. Keep framing, camera angle, lighting and crop consistent across categories.

07 — Visit LALA

Real storefront at day and night, signboard, counter, seating/interior and a welcoming service moment. Use owner-approved photos.

05. Ready-to-use image generation prompts

Hero key visual

```
Photorealistic luxury Indian dessert campaign, a tall elegant transparent glass filled with thick golden saffron almond masala milk, creamy surface, pistachio slivers, almonds and saffron strands, dramatic swirling ribbon of milk wrapping around the glass, floating droplets and ingredients, deep oxblood burgundy background, warm amber rim light, rich cinematic shadows, premium editorial food photography, ultra-detailed glass condensation, sophisticated composition, no text, no logo, wide 16:9.
```

Hot beverage product set

```
Premium studio food photography of an authentic Indian hot masala paal in a clear glass, creamy milk with saffron and chopped almonds, subtle steam, deep burgundy seamless background, warm golden key light, realistic texture, appetising and refined, isolated composition, no text, no logo, square product image.
```

Falooda

```
Luxury editorial food photograph of a tall Indian royal falooda glass with rose syrup, vermicelli, basil seeds, chilled milk and a scoop of ice cream, layered translucent colours, pistachio garnish, condensation on glass, burgundy and warm gold studio setting, dramatic lighting, no text, no logo, square composition.
```

Traditional sweets

```
Premium Indian mithai product photography: a carefully arranged selection of beetroot halwa, carrot halwa, Mysore Pak, badusha, kalakand and laddu on a dark stone platter, rich natural textures, warm directional lighting, deep maroon backdrop, sophisticated food editorial, no text, no logo, wide composition.
```

Milk splash element

```
Photorealistic creamy milk splash frozen in a graceful circular arc, fine droplets, soft translucent edges, warm studio highlights, isolated on transparent background if supported, high-speed beverage advertising photography, no glass, no text.
```

Ingredient cutouts

```
Photorealistic floating pistachios, almonds, saffron threads, cardamom pods and rose petals, individually separated with clean edges, soft warm highlights, high detail, isolated on transparent background if supported, no text.
```

Storefront photography reference

```
Authentic contemporary Indian dairy and sweets shop in Triplicane Chennai, warm welcoming shopfront lighting, clean glass display counter, traditional sweets and milk beverages visible, documentary architectural food retail photography, realistic Indian urban street context, no invented signage, no readable brand name.
```

Texture — burgundy

```
Seamless deep oxblood burgundy velvet fabric texture, subtle folds, low contrast, luxurious tactile surface, soft cinematic light, no objects, no text.
```

Texture — cream liquid

```
Macro abstract creamy milk surface with elegant flowing folds and subtle highlights, warm ivory palette, seamless fluid texture, no splashes, no objects, no text.
```

06. 3D asset and WebGL checklist

- Hero glass model (GLB/GLTF): clean topology, realistic glass material, separate liquid mesh.
- Milk surface: animated shader or carefully modelled geometry; avoid expensive full fluid simulation on mobile.
- Milk ribbon: spline/tube geometry with shader-driven highlights and particle droplets.
- Ingredient models: pistachio, almond, saffron, cardamom and rose petals; use instancing for repeated elements.
- Sweet models: only model hero products that benefit from close-up interaction; use photography for the full menu.
- Falooda glass: layered ingredients, glass and ice cream as separate meshes.
- Environment: dark burgundy studio, soft area lights, reflection environment map and subtle ground plane.
- Scroll choreography: camera path and object transforms keyed to scroll progress; keep text in accessible HTML.
- Mobile fallback: use a lighter scene, fewer particles, lower DPR and static hero image when needed.
- Reduced motion: provide a non-animated experience when prefers-reduced-motion is enabled.
- Asset delivery: use compressed GLB, KTX2/Basis textures, WebP/AVIF images and lazy loading.

07. Photography and production specifications

Asset	Recommended specification
Asset	Recommended specification
Hero desktop	3840×2160 master; export WebP/AVIF around 1920×1080 for web; keep subject away from text area.
Hero mobile	1080×1440 or 1080×1920 alternate crop; glass and headline must remain legible.
Product images	At least 1600×1600 master; consistent angle, light and background; export WebP/AVIF.
Section banners	2400×1350 master; responsive crops for mobile.
Transparent elements	PNG/WebP with alpha for 2D overlays; GLB/GLTF for actual 3D assets.
Storefront	Shoot both daylight and evening; landscape and portrait; capture actual signboard clearly.

08. Asset sourcing and usage rules

Use La La Paal Nilayam's Instagram, Swiggy and owner-supplied photographs as research references. Do not scrape, republish or assume permission to reuse third-party photos. Obtain explicit approval from the owner for brand assets, shop photographs and menu imagery. AI-generated images are concept visuals and must not be presented as actual products or the actual storefront.
